

Our Induction Videos

What is safe church and why we have it?

Our Safe Church Policy

Work, Health and Safety

Overview of the new process to server in 2021
(in particular going through Code of Conduct)

Who to go to if you have conflict or a
complaint

What is safe church?

Government require us to provide a safe environment in every respect

Churches have been examples of unsafe abusive environments with lifelong consequences for victims and their families

We cannot change the past

We can commit ourselves to the requirements and best practices that have been established by our authorities in order to make our churches as safe as possible

More than tick a box or compliance

Easy to see as tick a box or compliance but is so much more

We want everyone who walks into our door or one of our programs to know that their safety is of paramount importance to us

They are worth being loved and cared for and protected

It's not just tick-a-box but about the gospel in practice

Hopefully, a powerful witness to our community that will restore some level of confidence in wider Australia that a church is a place that you can trust with the care of your children or vulnerable adults

Safer church –
stronger witness –
invest in this
outcome

For those already service or who have been serving for years a strange and unnecessary formality but its important that we start with all of our volunteers new or existing adhering to this new framework so that they are supported in their role and the church is a safe place for all

If it makes the church safer and our witness stronger – then let's investing ourselves to that outcome

Thanks for partnering -
